Today, Nobel Oil Services is a progressive, value-generating group of service companies that presents a distinctive brand in oil, gas and energy sectors, while providing responsible and sustainable business operations.

As a rapidly developing group of companies, Nobel Oil Services has gone through a rigorous journey to reach the considerable growth and accomplishments it prides on today. We joined the market in 2005, offering procurement services to the oil & gas industry of the Caspian region. Since then, we have grown organically and broadened with our capabilities to provide drilling, workover, engineering, construction, project management, oilfield operations, equipment maintenance and enhanced oil recovery services. Since 2015, we have been following a dynamic business development strategy, acquiring new businesses, and creating joint ventures.

Sustainability takes the center stage of our operations and remains an integral part of our business practices. For more than 14 years of our work in Azerbaijan, our focus has been modeling a sustainable business concept while prioritizing safety and the environment with the aim to win the trust of our stakeholders. We aspire to contribute positively to the environment where we set our operations while continuing to ensure excellence in our performance. This is a significant challenge that is woven into the fabric of the way we do business.

By now, we have managed to build a rich portfolio by keeping a close watch on changing market trends and discovering promising courses for development. Having earned a reputation of a reliable and trusted partner in the market, we are driven by a strong desire to expand our business to a greater region and have already achieved progress in this regard. From the strategic point of view, we aim to continue our market growth, maximize our economic and operational efficiency, and continue investing in the social and economic potential of Azerbaijan.

As we move forward into the future, we intend to continue upholding our values of safety, quality, one team, integrity, and excellence. By maintaining a safe, environmentally responsible and economically sustainable business, we can deliver even more benefits and meaningful contributions to the people of Azerbaijan in years to come.

VUGAR SAMADLI,
CEO

Preparation of the Report

The decision to prepare Nobel Oil's first Sustainability Report was an essential step towards the implementation of our company's strategy to increase business transparency and develop a responsible dialogue with stakeholders. This is our first Report in which we try to inform our stakeholders about our activities, achievements and plans in the field of sustainable development. The Report presents our economic, environmental and social values, as well as what was done during the reporting period to put them into action. The Sustainability Report preparation process helped our company in defining our concept of sustainable development and approaches to non-financial reporting in general.

Reporting period

The Report was prepared for 2018. The Report also mentions events and activities that occurred earlier than this period. For analytical purposes, it also includes comparisons with two previous years and our planned figures for 2019. External verification of this Report was not conducted. We are considering that the future releases will be independently verified.

Borders and scope of the Report

Since this is our first consolidated Report on sustainable development, it was decided to include the head office of Nobel Oil Services (UK) Limited and its subsidiaries, branch of Nobel Oil Ltd in the Republic of Azerbaijan (Nobel Oil), GLENSOL and PROKON in the scope of the Report. The Report presents our activities in the territory of the Republic of Azerbaijan, as it is our central region of operation.

Principles for determining the content of the Report

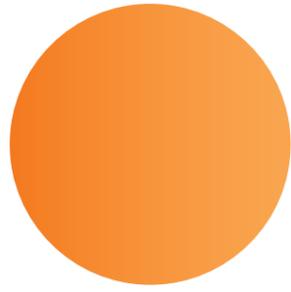

During preparation of the Report for 2018 the Company used the guidelines

of the Global Reporting Initiative (GRI) Sustainability Reporting Standards as a methodological framework. We disclose the most relevant issues in the Report and analyze the aspects of sustainable development, regarding the particular indicators on topics identified in the standards and examined by the UN Sustainable Goals. In addition to this, we analyzed independent media publications on the company's activities and reports on the sustainable development of international companies. We also conducted interviews with employees responsible for various areas of sustainable development to ensure the interests of internal and external stakeholders.

Stakeholder engagement is a crucial part of the process of the key aspects' analysis. The company constantly interacts with its stakeholders to be aware of their changing needs and expectations. We are committed to the principles of respect for all the parties' interests, frequency of contacts, as well as well-timed reporting on key aspects of our activities. We build relationships with many stakeholders by using the relevant means and methods (see the Stakeholder Engagement table on page 4). A comprehensive analysis identified the key aspects in the Materiality Matrix.

The financial and economic indicators presented in the Report resulted from the audit conducted based on international financial reporting standards (IFRS).

WHO WE ARE

ABOUT THE COMPANY

Nobel Oil Services (UK) Limited is a rapidly growing and diversified group of energy-related businesses. We provide exceptional value to customers and deliver innovative solutions while adhering to the highest ethical standards.

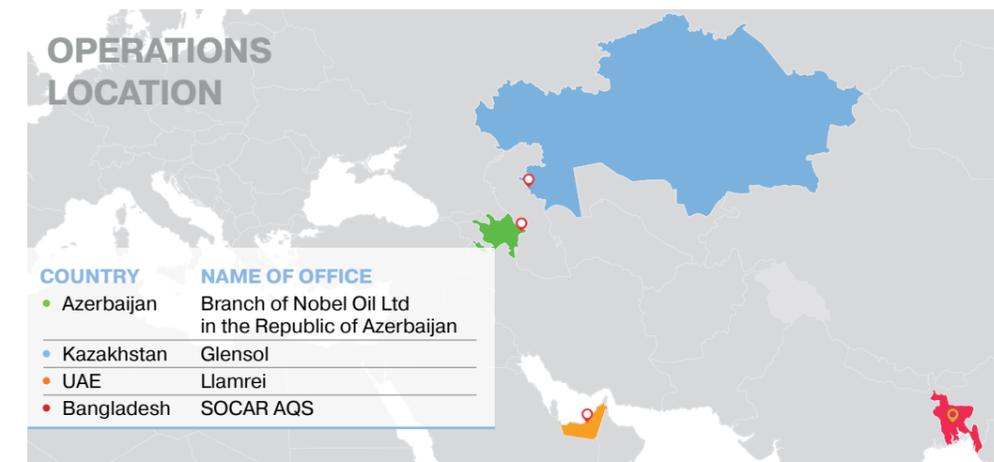

Nobel Oil Ltd was originally established in 2005 as a technical service provider, offering services to the oil and gas industry in the Caspian region. These included wells workover, drilling, installation, construction, engineering, repair & maintenance services. In 2013, Nobel Oil undertook a comprehensive strategic review of its business, with a focus on assessing the company's organizational capabilities, strategic goals, operating markets and growth options both regionally and globally.

In 2014, Nobel Oil reorganized its corporate structure to place its Azerbaijan-based businesses under a parent company headquartered in the UK and align its business processes with international standards. As a

result, all service segments of the oil and gas industry were united under Nobel Oil Services (UK) Limited.

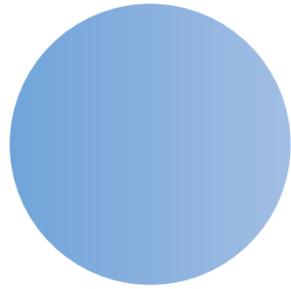

Nobel Oil Services (UK) Limited was founded on 25 June 2014 and registered in the United Kingdom. Nobel Oil Services (UK) Limited is a parent company of Global Energy Solutions, PROKON, SOCAR AQS and Llamrei. It also has several joint venture companies such as GVL, SDL Denholm Limited, Lamor NBO, Wood Group Azerbaijan and Turan Drilling & Engineering Company.

Today, Nobel Oil grew into a progressive, diversified, value-generating service group in the oil, gas and energy sectors and turned into a recognizable brand.

COMPANY STRUCTURE

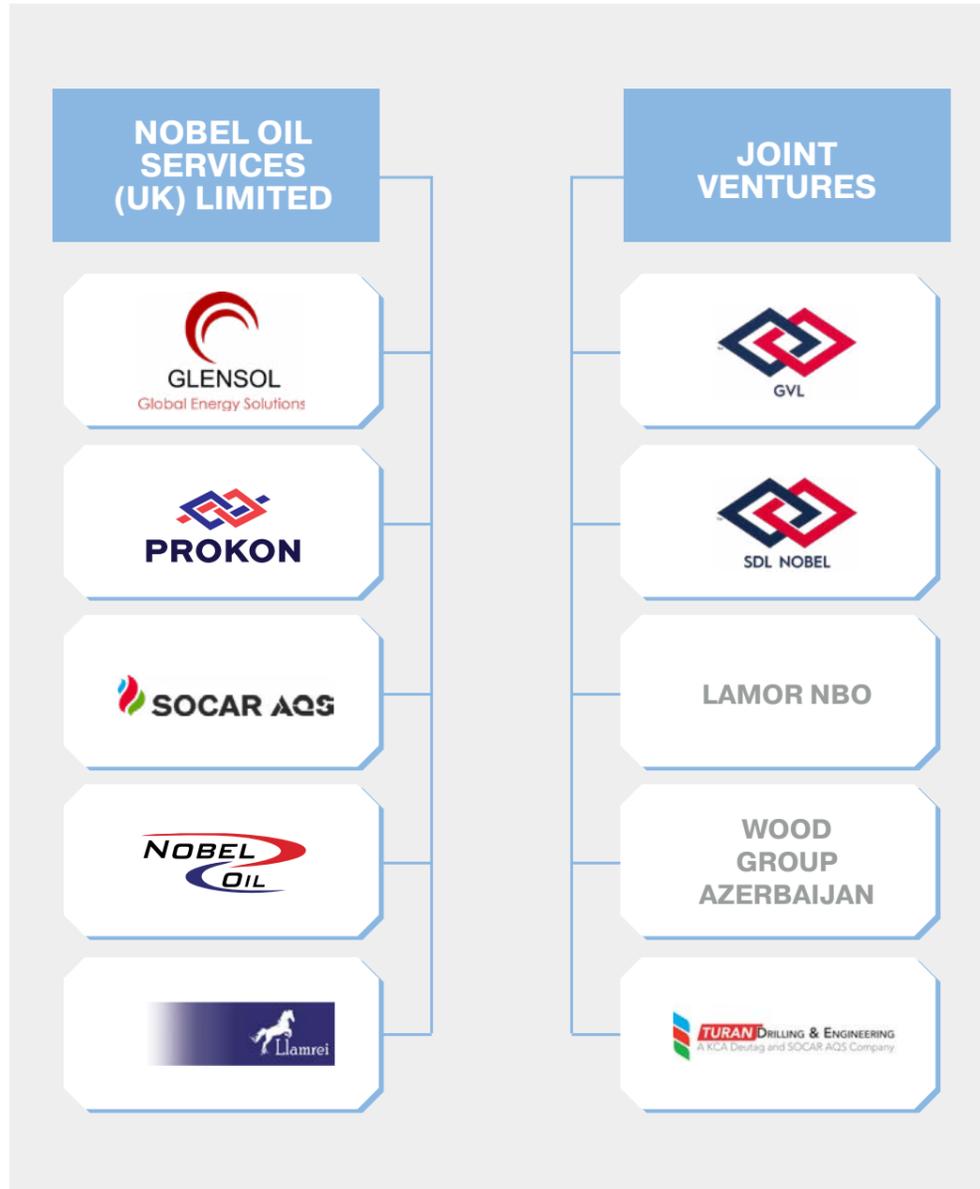

COMPANY STRUCTURE

ABOUT THE COMPANY

ABOUT THE COMPANY

OUR PHILOSOPHY

Our philosophy is based on ethical conduct, mutual trust and teamwork. To ensure continuous improvement we challenge, test, reevaluate and continually raise our standards of excellence. Nobel Oil's success depends upon the combined capabilities and the contribution of all team members. All our management is dedicated to fostering a work environment that challenges, enriches and rewards each individual.

NOBEL OIL SERVICES

Provides management oversight & governance to the Group companies.

SOCAR AQS

Provides integrated drilling and well services management, including drilling of horizontal, multilateral and directionally deviated wells, well design and planning, well completion, well workover and intervention, sidetracking, casing running and other drilling-related services.

GLOBAL ENERGY SOLUTIONS(GLENSOL)

Provides installation, commissioning, start-up, operation, maintenance of gas turbines and compressors. GLENSOL also provides offshore top drive maintenance services as well as inspection, maintenance and repair capability for other rotating and static equipment. In partnership with Suez, GLENSOL offers operational solutions in the water treatment area.

PROKON

It is a project and construction management company, which focuses on fabrication, construction and installation of offshore gas injection plants, offshore power stations, onshore and offshore gas processing facilities and refining facilities, polymer and fertilizer plants.

LLAMREI

Provides a wide range of oilfield materials and equipment for its clients related to drilling, projects, maintenance and production operations. Llamrei focuses on optimizing the flow of material and equipment from the point of origin to customer delivery.

SDL NOBEL

Provides onshore and offshore fabrication and installation services, including the fabrication and installation of structural steelwork, upgrades of offshore facilities, pipework systems including high-pressure flow lines, vessels, tanks and related packages.

GVL

Provides support solutions for the full life cycle of valves. The range of services among others includes valve overhaul and repair, valve diagnostics, maintenance engineering, testing and certification.

LAMOR NBO

Main service lines include oil spill response, waste management, wastewater treatment and soil remediation. Lamor NBO has also the advantage of being able to rely on an extensive framework of partners to provide customers with ancillary services and infrastructure, such as vessels, dispersants, waste management and disposal, and capping stack systems.

WOOD GROUP AZERBAIJAN

Provides engineering and operations support services to the oil and gas market in Azerbaijan. It primarily supports the delivery of brownfield engineering, procurement and construction management contracts across a range of offshore assets in Azerbaijan.

TURAN DRILLING & ENGINEERING COMPANY

Provides offshore drilling and rig engineering services, including Drilling Rig Maintenance, Drilling Rig Operation, Drilling Rig Maintenance & Procurement, RDS engineering and construction workstream as well as warehouse management.

KEY PROJECTS

KEY PROJECTS

ABOUT
THE COMPANY

ABOUT
THE COMPANY

KEY ONGOING PROJECT

HEYDAR ALIYEV OIL REFINERY

Baku, Azerbaijan

Scope of works:
Steel Structure Erection,
Piping Fabrication and Erection, Equipment erection works.

EPCM

Caspian Sea, Azerbaijan

Scope of works:
Engineering, Procurement and Construction Management across 8 offshore platforms (ACG & Shah Deniz), including Small Engineering Modifications (CAT-C), Brownfield projects (CAT-B), TAR (Turnaround) for all discipline work, Maintenance Projects (repair, fabric maintenance, etc).

ELECTRICAL & INSTRUMENTATION

Azerbaijan-Georgia-Turkey (AGT) region

Scope of works:
Execution, service, installation, commissioning, modification and inspection services designed to maximize uptime and optimize assets life cycle.

VALVE MAINTENANCE

8 offshore platforms, Sangachal Terminal and 4 export pipelines within Azerbaijan and Georgia

Scope of works:
Valve maintenance services, including among others valve overhaul and repair, valve diagnostics, maintenance engineering.
General information: Support solutions for the full life cycle of valves.

KEY COMPLETED PROJECTS

AMMONIA & UREA COMPLEX

Sumgayit, Azerbaijan

Scope of works:
Civil, building, piping, steel structural, painting, insulation, equipment, erection, HVAC, electrical and instrumentation.

Scope Description:

Compression Excavation 218,915.00 m³
Backfilling 146,548.00 m³
Rebar approx. 6,000.00 Ton
Concrete approx 65,000.00 m³
Road & Pavement (Asphalt) 43,299.00 m²
Road & Pavement (Concrete) 4,960.00 m²
BUILDINGS (5 ea) 6587 m²
Structural Steel Erection 5,958.00 Ton
Piping Works 348,873.00 DI

Equipment Erection Works 10,631.00 Ton
E & I Cable Pulling Works 1,078.00 km
Painting Works 125,753.00 m²
Insulation Works 58,353.00 m²

KEY COMPLETED PROJECTS

SOCAR POLYMER Sumgayit, Azerbaijan

About the Project:

The Project Construction Area has been cleaned from debris and existing facilities and utility connections in the Project Area has been removed. The Project Area has been backfilled and compacted up to the Project Zero Level.

Scope of works:

General Excavation of 405,900 m³, Mass Backfill from stockpiles of 130,000 m³ and Mass Backfill from imported soil of 290,000 m³.

OIL ROCK GAS TURBINE COGENERATION POWER PLANT

Caspian Sea, Azerbaijan

About the Project:

Neft Dashlari Power Plant consists of 6 turbines and Generators (8 MGW). The total capacity of power generation is 48 MGW. 2 Turbines are capable to work with dual fuel provide with the Diesel system. 3 Turbines are capable to run continuously and the other 3 are in standby.

GUNESHLI DEEP SEA WATER PLATFORM COMPRESSOR STATION

Caspian Sea, Azerbaijan

About the Project:

The new compressor station has been constructed at Caspian Sea Guneshli Deep Sea Water Platform No # 4 in 2012. The purpose of the gas compressor station is to collect low-pressure gases and transport it to the suction of BCS-2 at Oily Rocks. The completed project consists of the establishment of two (2) Siemens SGT400 twin shaft gas turbine compressor drivers, two (2) Siemens STC-SH driven units gas compressor units and two (2) Siemens STC-SV driven units gas compressor units.

GUNESHLI DEEP SEA WATER PLATFORM COMPRESSOR STATION

Caspian Sea, Azerbaijan

About the Project:

The new compressor station has been completed with main equipment of 8 gas turbine drive centrifugal compressor units, consisting of 4 (3 operational + 1 spare) first stage (LP) and 4 (3 operational + 1 spare) second stage (HP) units as well as gas dehydration unit and all associated process equipment with output of 3 mln. m³/day and working pressure of 12,5 MPa.

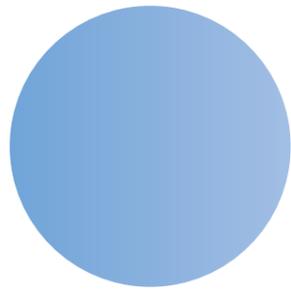

PIPELINE PROJECT FOR CEMENT PLANT

Baku, Azerbaijan

Scope of works:

Engineering and Design of Pipe Line (8 km "530x8mm dia." + 0.33 km "325x10mm dia.") and Internal Cement Plant Area (in accordance with SNIP&GOST Standards), Supply of Pipes, Pipeline Construction Activities, Automatic Gas Distribution Pressure Reduction Station Construction and Erection Activities, Obtaining Governmental Approvals for the Pipeline and Automatic Gas Distribution Pressure Reduction Station, Commissioning Activities of Facilities and Gas Pipeline.

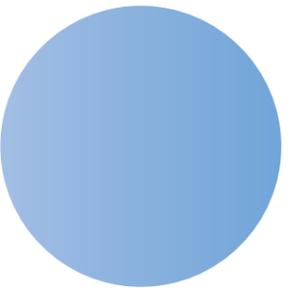

FINANCIAL PERFORMANCE¹

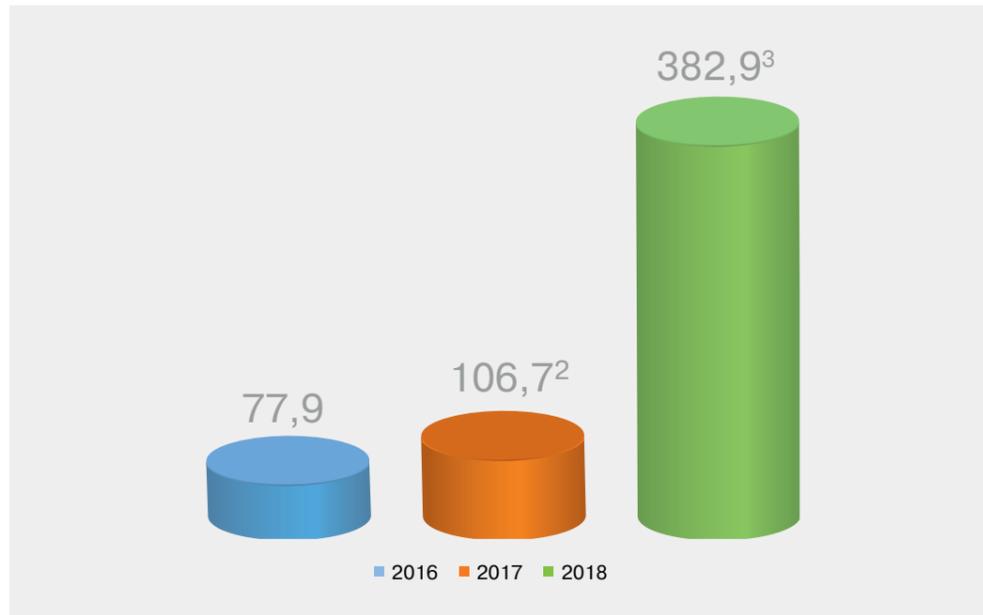

OUR APPROACH

ABOUT THE COMPANY

SUSTAINABILITY APPROACH

REVENUE, mln\$

REVENUE BY BUSINESS AREA, mln\$

¹The indicated data includes the entire Nobel Oil Services (UK) Limited as a Group. For more detailed information on the company's financial operations, please visit http://www.nobeloil.com/assets/Site_18/files/Report2018.pdf

²Reason for sharp increase in figures between 2017 and 2018 due to recognition of SOCAR AQS revenue as subsidiary from 2018

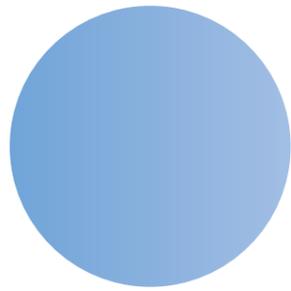

³Revenue from construction contracts for 2018 comprises of the revenue generated by Prokon in the amount of 11 million \$ and SOCAR-AQS in the amount of 330 million \$. Revenue generated by SOCAR-AQS is mainly composed of the offshore well drilling services rendered to its customers

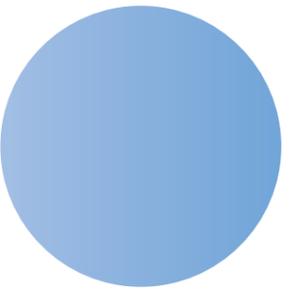

Our sustainability or long-term future as a successful business relies upon our ability to balance economic, social and environmental issues in our decision making processes across our business. We believe that doing this right is the key to being a great company and helps to ensure we identify and appropriately manage risk and opportunities.

The Company's goal in the field of sustainable development is to grow into an international engineering and construction services company while making a positive contribution

to the social-economic development of the countries of its presence, and following standards of industrial and environmental safety, corporate governance and social responsibility.

MANAGEMENT SYSTEM

SUSTAINABILITY APPROACH

NOBEL OIL SERVICES SUSTAINABILITY PILLARS

STRUCTURE OF THE SUSTAINABILITY MANAGEMENT SYSTEM

The direction of activities in the field of sustainable development is carried out by the Nobel Oil management at various levels. Competence of the Board of Directors includes strategic management of issues related to activities in the field of sustainable development, as well as consideration and approval of documents of the highest level.

Operational management of sustainable development is carried out by specialized departments within Nobel Oil. All department heads regularly meet with the general director and submit monthly reports to review and discuss implemented activities, improvements, and tasks. In subsidiary companies of the Group, these issues are managed by company executives. Companies within Nobel Oil group can develop their sustainable development documents that consider the industry specifics of their activities.

Our objectives in the field of sustainable development include:

- improving corporate governance system;
- creating an effective and transparent system of interaction with our stakeholders;
- promoting personal growth and professional development of our employees;
- promoting social-economic development of regions of presence;
- ensuring the safety of our employees, contractors and public during carrying out activities of the Company;
- minimizing our negative impact on the environment;
- promoting rational use of natural resources;
- introducing innovation in all areas of the Company's operations.

VISION, MISSION, & VALUES

VISION

Our vision is to be our customers' primary choice and most trusted partner, in all our business lines through successfully delivering the best services with the passionate and active engagement of our people.

MISSION

Our mission is to deliver superior services and solutions with quality-driven processes in a safe, efficient and environmentally responsible manner.

VALUES

SAFETY

We conduct our business according to the highest standards of social, environmental, and safety practices. We are committed to being a good corporate citizen. Our top priority is on the health, safety, the security of our workforce protection of assets, and the environment.

ONE TEAM

As an international company, we value and respect the uniqueness of the cultures in which we work. Wherever we operate, we have an inclusive work environment and embrace a diversity of people, ideas, talents, and experiences. We aim to build a healthy environment and work as one team.

QUALITY

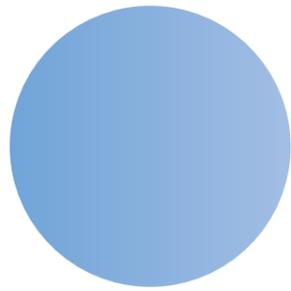

We assure a quality component and quality control service of the Company. We comply with all relevant quality standards and regulations.

INTEGRITY

We are honest with others and ourselves. We meet the highest ethical standards in all business dealings. We do what we say we will do. We accept responsibility and hold ourselves accountable for our actions and inactions.

EXCELLENCE

We strive for excellence in what we do, aiming for a high level of performance and operational efficiency.

THE UN SUSTAINABLE DEVELOPMENT GOALS

ABOUT THE REPORT

In 2016, the 17 UN Sustainable Development Goals (SDGs), designed to maintain the well-being and preservation of our planet officially came into effect. In 2018, Nobel Oil worked to identify the SDGs that are most affected by our operational activities in order to identify areas that could best benefit from our meaningful contribution. We remain aware of our Company's capability to directly impact and accelerate the achievement of the SDGs through providing reliable and sustainable technological solutions in the oil & gas industry. Below are the most significant SDGs for the Company as well as the contributions we made to them.

- Percentage of expenses on local suppliers
- Local employment
- Transparent tax payment

- Protection of employees and stakeholders from accidents
- Health safety of employees

- Education, development and preparation of human resources
- Collaboration with high educational institutions

- Effective project planning
- Encourage rational water usage among employees

- Use of energy-efficient technology

- Employee evaluation
- Maintaining employment among the young generation and disabled people
- Implementing actions to develop local suppliers

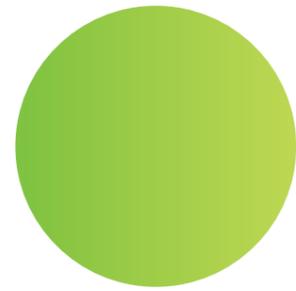

- Use of clean and environmentally friendly technologies
- Increasing efficiency in the use of resources
- Increasing the technological potential of our enterprises

- Effective management of waste
- Compiling with local and international rules and laws in relations with the protection of the environment
- Effective project management

OUR APPROACH

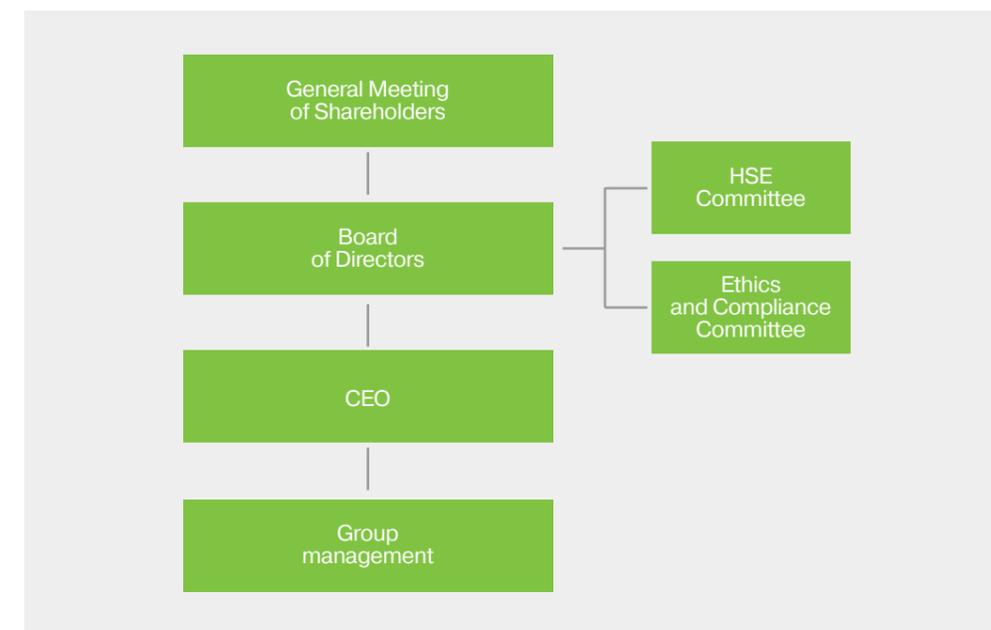

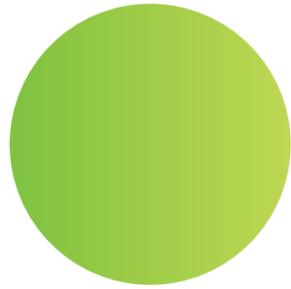

GOVERNANCE

Our reputation as an honest and trustworthy business partner is essential for winning and maintaining the trust of our partners and associates. We strive to maintain transparency in conducting business with our stakeholders, who grant us their trust in return. Our company perfects the

corporate governance system in line with the local and international legislation, plus international practices. We intend to continue working in this direction to increase effective governance, enhance our competitive advantages and create necessary conditions for sustainable growth.

GOVERNANCE STRUCTURE

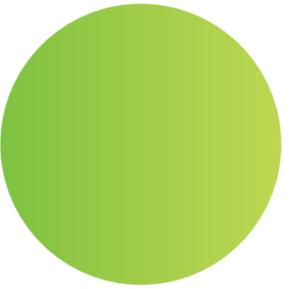

MANAGEMENT SYSTEM

MANAGEMENT SYSTEM

GOVERNANCE

GENERAL MEETING OF SHAREHOLDERS

The general meeting of shareholders of the private company Nobel Oil Services (UK) Limited is the supreme governing body of the company, which makes critical decisions on the most vital matters. The shareholders' role in the company's management includes appointing directors and auditors, as well as ensuring that the current management structure meets the required standards.

BOARD OF DIRECTORS

Board of Directors was formed based on proposals received from the Nobel Oil shareholders. Board of Directors carries out general overall management of the company's activities. Their duties include setting the strategic goals of the company, managing their implementation, overseeing business management and informing shareholders of their direction. The main activities of the Board of Directors are governed by the legal and regulatory documents, legislative authorities and by the general meeting of shareholders. The Board has one executive and two non-executive members.

EXECUTIVE

NON-EXECUTIVE

The board of directors is balanced in terms of retaining the key competencies necessary for practical work. The vast accumulated experience and knowledge of the board members enable them to deliver optimal solutions at any time. With extensive experience in the private and public sectors, members of the board of directors possess skills in strategic management, corporate

governance, corporate finance, risk management and HSE, as well as critical knowledge and expertise of the industry.

During the reporting year, the Board of Directors of Nobel Oil has made several crucial decisions aimed at the company's advancement in the field of sustainable development.

- To conduct in-depth strategic analysis and develop future strategy - the decision to collaborate with McKinsey was made;
- To improve HSE system – the establishment of a committee for the HSE and reorganization of the entire system was approved;
- To improve the preventive measures and detect cases of bribery – the introduction of ISO 37001 anti-corruption management system was also decided.

COMMUNICATION WITH THE BOARD OF DIRECTORS

Our management and the Board encourage transparent and open communication with shareholders, employees and all interested parties.

CHIEF EXECUTIVE OFFICER

The Chief Executive Officer provides operational management of the company's activities and acts within the scope of its competence, established by the Nobel Oil company regulations.

ETHICS AND COMPLIANCE COMMITTEE

The company has established an Ethics and Compliance Committee. The committee is composed of five members with the voting authority and one member without the voting right. The primary function of the Committee is to monitor and resolve ethical and compliance issues within the company, including aspects of the following nature:

- Assistance in the development, implementation and operation of an effective program of ethical and legal compliance;
- Promotion of a company culture that encourages compliance with the regulations and the standards of ethical conduct;
- Consideration and resolution of any issues regarding the understanding of all aspects of the program of the ethical and legal compliance;
- Effective implementation of risk management, audit and compliance issues by the company;
- Implementation of the compliance system under the laws and regulations;
- Ensuring compliance of the company's policies and procedures with the local legislation and responding to various compliance risks.

- Group HSE Lead, Chairperson and Secretary
- Chief Executive Officer, Member
- Chief Operating Officer, Member
- Chief Commercial Officer, Member
- Chief Financial Officer, Member
- Group HR Manager
- GLENSOL GD
- PROKON GD

GOVERNANCE

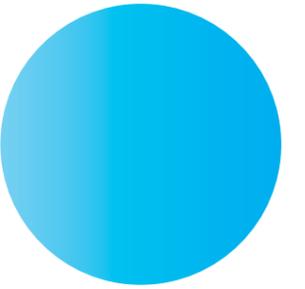

³Detailed information is given in the HSE section

RISK MANAGEMENT

BUSINESS ETHICS

GOVERNANCE

Our management pays special attention to issues of risk coordination to provide a reasonable guarantee of achieving our strategic goals, which allows for the timely identification, analysis and prevention of possible threats and losses.

Our company considers the risk management system as an aggregation of interrelated organizational measures and processes, organizational structure, local regulatory acts and

other regulatory legal acts, documents, methods and procedures such as regulations, standards and guidelines, as well as corporate culture norms and actions taken by management and employees of the Company, aimed at providing sufficient guarantees for achieving company goals and solving problems.

This whole aggregation aimed at supporting our management and employees in making critical decisions.

BUSINESS ETHICS

Ethics remains an integral part of our business. The company's policies and documents were developed in accordance with the UK and local legislation and government authorities, as well as the best international practices for the Code of Conduct and Business Ethics. Our Code reflects the commitment of our employees to high ethical principles of business conduct and includes a set of universal laws and business standard behavior and interaction of employees among themselves, their business partners and stakeholders.

Training and Communication

Our company conducts briefings and training for our employees and suppliers regularly. We aim to ensure that all our employees are made aware of the relevant functional channels for issue reporting. Each employee of the company may refer to the business ethics hotline if they believe that they have witnessed a violation of the Code or if they have been made aware of such conduct.

ETHICS & COMPLIANCE HOTLINE
<http://www.nobeloil.com/contact-us.aspx>

Monitoring Effectiveness

In the reported year, the list of internal procedures and documents was revised in coordination with the conducted external audit, as well as with the implementation of ISO 37001:2016. The key changes were made regarding the improvement of the anti-bribery system.

HUMAN RIGHTS

Our company guarantees equality of rights and non-discrimination based on

nationality, sex, origin, age, religion, and any other grounds, as well as workers' right to associate with any public organizations of their choice.

We actively encourage our employees and other interested parties to report any actions that are not consistent with human rights and fair labor practices and provide the necessary mechanisms for their appeal. In 2018, no appeals and complaints related to discrimination and violation of human rights in the workplace were received by the Company.

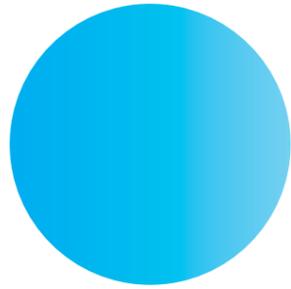

NON-DISCRIMINATION

Our business ethics not only defines the standards of ethical behavior in relations with our business partners but also implies our commitment to the principles of sustainability, equality of opportunity and non-discrimination. We undertake the necessary efforts to enable the personal development of our employees and maintain their social awareness by supporting them in volunteering for appropriate social and community initiatives.

Nobel Oil maintains policies and procedures that allow our HR personnel to hire, develop and retain employees based on job descriptions, regardless of their gender, race, nationality, religion, language, social origin, financial status, political or other beliefs. The HR Department has overall responsibility for this policy and maintains the reporting and monitoring procedures. All senior managers, managers and employees are required to comply with the aforementioned requirements of non-discrimination.

Employees are expected to conduct themselves professionally.

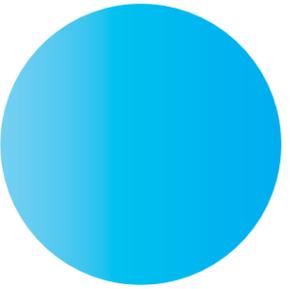

ETHICS AND COMPLIANCE

ANTI-CORRUPTION AND ANTI-BRIBERY

CONFLICT OF INTEREST

ETHICS AND COMPLIANCE

We do not tolerate any form of abuse or harassment of employees, our customers or our contractors, suppliers, visitors, government officials or any other person we deal with. Intimidation, harassment, racist remarks, discriminating conduct, inappropriate language, verbal aggression, physical aggression, threatening behavior, insults or sexual aggression are considered serious acts of misconduct which will not be tolerated and will lead to disciplinary action and/or dismissal.

ANTI-CORRUPTION AND ANTI-BRIBERY

Corruption is globally regarded as one of the major economic phenomena. Our company assigns great significance to the prevention and combating of corruption and demonstrates strict compliance with the local and British legislation. We are subject to and will abide by the UK Anti-Bribery Act 2010, US Foreign Corrupt Practices Act 1977, Convention Combating Bribery of Foreign Public Officials in International Business Transactions 1997, The United Nations Convention against Corruption 2003, ISO 37001:2016 Anti-Bribery Management System and the anti-bribery and anti-corruption laws of the countries in which we operate or conduct our business. Policies and procedures have been established to prevent, detect, report and investigate actual or suspected cases of bribery and corruption. Directors and employees are required to abide by these laws and Company policies and procedures governing anti-bribery and anti-corruption.

In 2018, to improve the preventive and detection measures for potential bribery cases, a decision was made to introduce an anti-

bribery management system ISO 37001:2016. The standard certification enables the company to apply certain measures that can serve as the basis for the integration of a control system designed to advance risk management in bribery cases.

Training and Communication

Anti-corruption communication and trainings serve as the key controlling elements. The company regularly conducts trainings for our employees and hired workforce. The Company shall require all of its employees to comply with the relevant policy, and shall communicate to employees the key principles, requirements and punitive consequences of non-compliance. Special training programs aimed at preventing bribery are carried and updated regularly to take into account any changes in the law.

During the years 2016-2018, 500 employees were involved in anti-corruption trainings.

The Company has implemented a clear and accessible procedure for reporting. The purpose of this procedure is to promote the implementation of the 'Reporting Corruption' and 'Raising Concern' principles by providing methods of informing employees and interested parties about actual or suspected cases of bribery, corruption or inappropriate behavior. By adopting this procedure, the Company follows the best corporate governance practices that serve to demonstrate its operational efficiency as an addition to other internal controls aimed at preventing any violations and minimizing the risk of corruption, fraud or other misconduct.

The company recognizes and respects the diversity and importance of the off-duty goals and interests of its employees. Nevertheless, the company cannot remain neutral in cases where, as a result of personal, family or other circumstances, an employee of the company loses or may lose loyalty and objectivity about the company. The resulting conflict of personal interests with the interests of the company may exert a negative impact on the company's effectiveness. Therefore, the company is taking action to prevent the occurrence of such conflicts.

The company has a control procedure in place to ensure the prevention of abuse of the official position and the occurrence of conflicts of interest. Each employee submits an annual form based on which the estimated risk of conflict is assessed.

INFORMATION DISCLOSURE

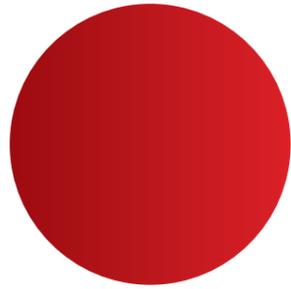

Information transparency is one of our main principles of corporate governance. Our company promptly informs stakeholders about the significant events in its business. A special part of the corporate governance system is attributed to information openness and financial transparency, combined with the preservation of the company's interests in the protection of trade secrets and confidential information. You can find the latest news, financial indicators, statements and other useful information of the Nobel Oil Group on our company website. The website also showcases regulatory documents for our corporate governance system.

ETHICS AND COMPLIANCE

OUR APPROACH

RECRUITMENT, SUCCESSION PLANNING AND DISMISSAL

Nobel Oil's staff remains the most important stakeholder and a key factor in the successful and sustainable development of our company in the long term. We strive to form a stable team of qualified, loyal and motivated employees who are committed to the goals of the company and are proud of their work in it. Securing the best talents, as well as providing high-quality care and opportunities for development for our employees are considered to be among our company's top priorities. The quality of human capital remains a critical factor in the development of our company and its regions of presence.

Our workforce

We value our employees and work to ensure that they have everything they need to build an excellent profile and offer qualified service to our clients. We work with a diverse team of professionals, who reflect the interests of our clients and communities in which we operate. To retain talents, we offer inclusive benefits and development programs for our employees, including competitive salaries, careers, job activities, trainings and leadership development.

2018 results

- Based on the adopted SOD matrix, new documents were revised and prepared following the company's needs and requirements;
- During this period, a training and development plan was developed and approved;
- The process of creating a CV database covering all companies of the Nobel Oil Services Group was launched;
- In our business units, a labor demand analysis was conducted by the internal audit. A plan for the optimization and provision of labor, as well as recommendations on the distribution of work, was developed based on the obtained results.

Plans

- Improvement and upgrade of the performance management process;
- Implementation of a new grading system;
- A "How to live Values" training project designed to boost the promotion of Nobel Oil's values;
- Further development of a Competency Framework;
- Realization of paid summer internship program
- Recruitment for HAOR Project
- Performance management
- Establishment of project-based KPIs;
- Technical skills development trainings.

Following our policy of staff recruitment and retention, we formulated a culture that reflects values, goals and ambitions of our company's employees. Our recruitment team understands the nature of the skills and talents that are needed in our industry for each line of business. We employ workers using a relevant of methods.

Vacancy placement

Our company regularly posts vacancies on relevant websites and channels. Anyone interested in a job can receive information about the application and selection process and apply for a vacancy through an online portal. In 2018, 100 open vacancies were filed with 3945 applications, from which 16 were hired after passing the recruitment procedure following the rules of our company.

CV database

Within the reporting period, the company has implemented an integrated CV database system. The use of the system helps the company to select specialists of varying degrees from different fields in a short period without loss of time.

Termination and redundancy Expiration of Employment Contract

A term employment contract may be terminated upon its expiration by any party of employment. HR Department will notify Department Manager about it 40 calendar days prior to expiration date. Department Manager should confirm his/her decision to continue or terminate employment one month prior to expiration date. Once the decision of termination has been confirmed by Department Manager, HR Department will notify

employee in written about the decision. If employment continues, the employment contract shall be renewed for a definite period.

Cases not depending on the will of employee and/or employer

If employment is terminated on the reasons not depending on the will of employee and/or employer (i.e. death of employee, his/her disability, employee is called to military service or sentenced to prison) the employment will be terminated. Labor Code of Azerbaijan Republic covers the factors that affect employees who will be terminated in these circumstances and details the guidelines for termination.

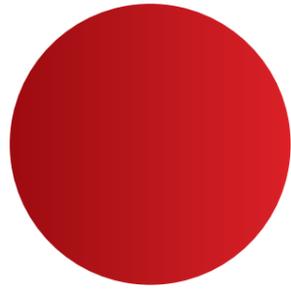

Further development of a Competency Framework

The aim of the project is to:

- Facilitate the recruitment and selection process of employees with a strong fit for the role, as well as the organization;
- Set performance expectations and evaluate employee contributions objectively;
- Expedite employees to enhance their performance and increase their level of work satisfaction;
- Map an employee's professional development and further career planning;
- Assess 'competency gaps' in individuals and teams and provide effective inputs for creating modules for increased development and training resources.

REGULATORY FRAMEWORK FOR RELATIONS BETWEEN THE COMPANY AND ITS EMPLOYEES

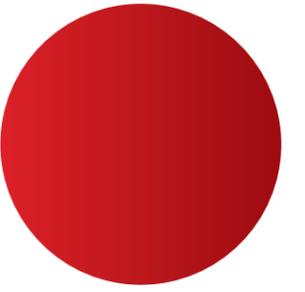

The Constitution of the Republic of Azerbaijan
UK Legislation System and Labor Code of the Republic of Azerbaijan

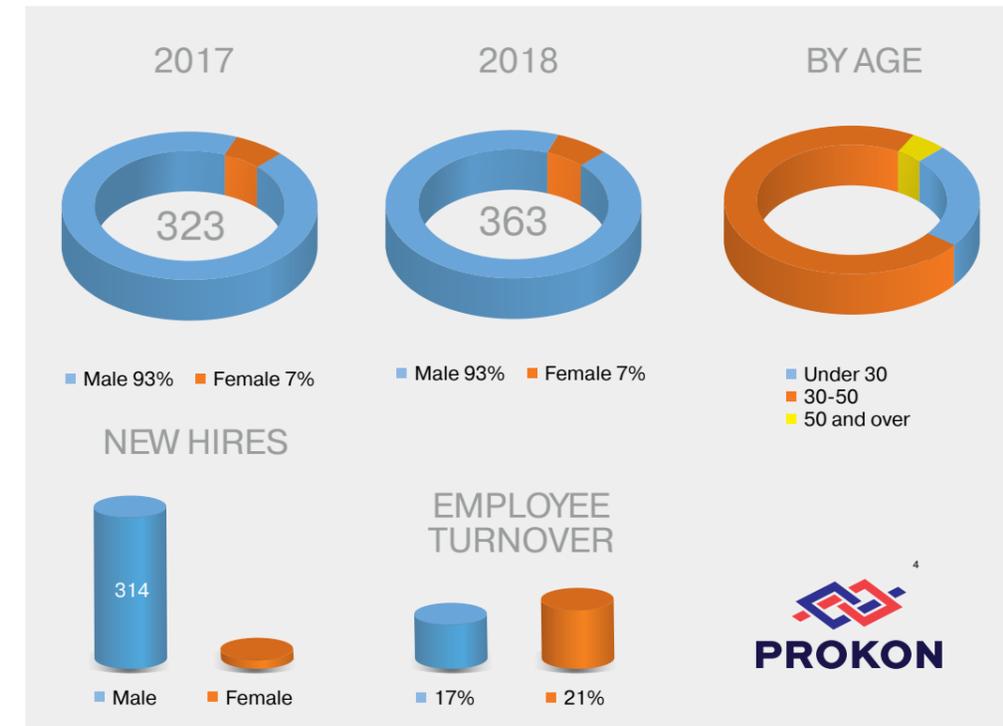

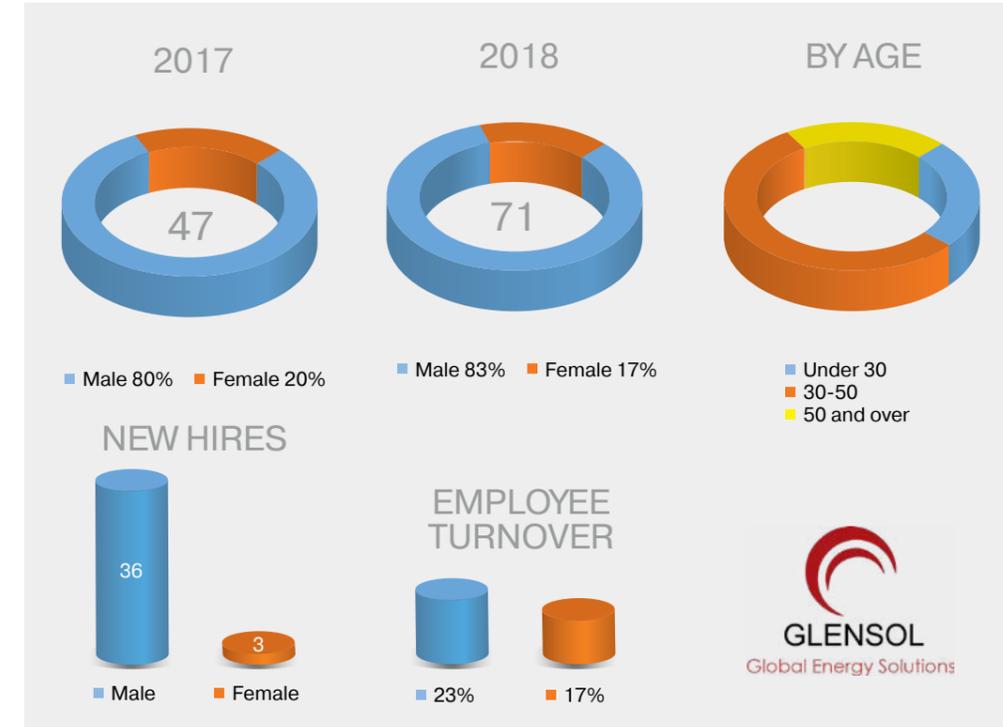

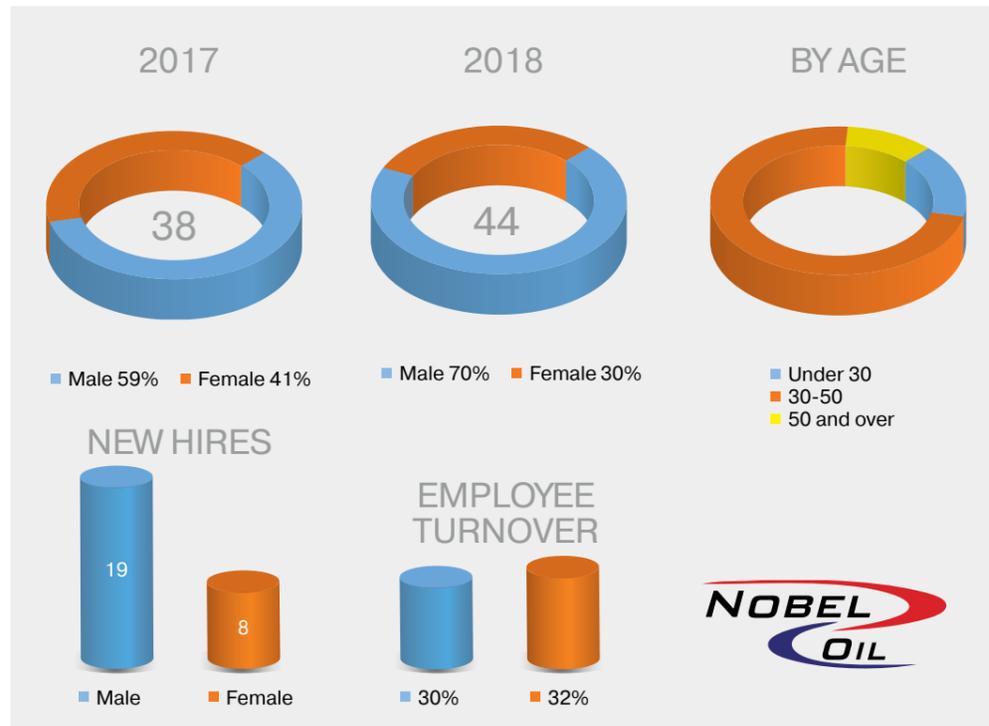

PERSONNEL PROFILE

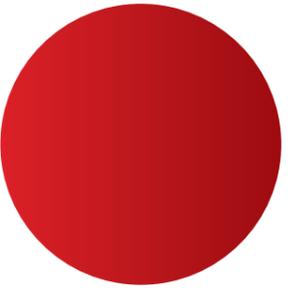

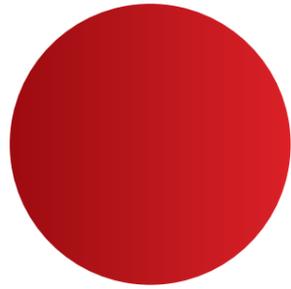

PERSONNEL PROFILE

HUMAN RESOURCES

*As the company primarily operates in the field of construction, the indicators are provided in the form of an annual average

REMUNERATION AND MOTIVATION SYSTEM

INTERNAL COMMUNICATIONS AND FEEDBACK SYSTEM

HUMAN RESOURCES

HUMAN RESOURCES

One of the main spheres of HR's activities is the motivation of our employees. Our company aims to preserve and increase labor productivity by strengthening the motivation of our staff in the working space. We offer a competitive salary, the level of which is much higher than the average minimum wage in the republic. The company and its subsidiaries operate under a time-based and piece-rate payment systems and offer additional bonus rewards. We constantly monitor the market level of wages in the context of professional categories. On this basis, depending on the financial condition of the Company, the issue of increasing wages for particular subsidiaries and professional categories is considered annually.

Compensation and Benefits

Our employee motivation system boasts a wide range of benefits and compensations. In this area, we pay great attention to issues that affect the quality of life of our workers. Our benefits and compensation packages include voluntary medical insurance, temporary disability allowance, occupational accident insurance, social insurance, as well as financial aid, paid leave (for example, parental, medical and additional pay), rewards and benefits for work and trainings. The package is available in Nobel Oil and all of its subsidiary companies. Employees in Nobel Oil Group are paid 100% salary while taking a vacation during any month.

Performance appraisal

An employee performance appraisal creates an opportunity for effective feedback and goal setting, making decisions on benefits, salary growth and duties extension. Employees should be informed about performance expectations, performance evaluation criteria, and what measures/benefits follow different levels of performance.

A performance evaluation process is to be held every year (or half-year at the sole discretion of the Company). The annual evaluation process is linked to the financial year to be a part of this process. Performance appraisal held in the middle of the year is primarily for the exchange of ideas on goal achievement

and setting new targets, while the end of year evaluation should define pay increases, bonuses, promotions, and training needs.

Performance management is concerned with the following:

- Performance advancement – in order to achieve corporate and personal goals;
- Personal development – to give a chance to an employee to attain personal goals;
- Networking and connection – to establish mutual understanding, information exchange between managers and employees and determine expected results.

Implementation of a new grading system

A single grading structure based on analytical job evaluations will provide fairness and a possible defense to equal pay claims.

This project allows us to empirically demonstrate employee's rationale for offering different levels of pay. In the frame of this project, it will be possible to determine the worth or value of one job about, or compared to another regardless of the characteristics or experience of the specific individual occupying the position at any given time.

This project involves determining the level of complexity, decision-making, and skills required for each job, which is then categorized accordingly.

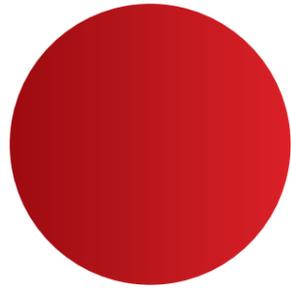

An important role in creating a favorable environment for effective organizational teamwork belongs to a highly developed system of internal communications. Employees should receive accurate information about corporate events that affect their rights and obligations and be able to convey their perspectives and problems to the company managers. To ensure that these standards of effective communication are met, we have created a system for informing employees about the goals, development prospects and current state of affairs in the Company. Through the information means available at Nobel Oil and its subsidiaries, all employees are informed about the events and developments in the Company.

One of the important elements of the internal communications system is our "open door" policy, which allows all employees to directly contact management about their concerns.

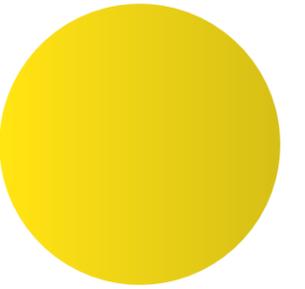

Staff Satisfaction Survey

Staff satisfaction, as the basis of high labor motivation, is an important aspect of our sustainability and development. We conduct annual employee satisfaction evaluations and take appropriate measures based on the survey results.

According to the 2018 survey, 80% of our employees were satisfied with their workplace conditions. In the future, we plan to develop a strategy for strengthening employee engagement through a satisfaction survey.

TRAINING AND DEVELOPMENT

HUMAN RESOURCES

Our investment in the training and development of our staff is another area of our active operation. We consider high-quality training a strong basis for the success of our employees, as well as for the success of our business. Employee training remains a key factor in the minimization of risks associated with unqualified employee actions.

Based on our annual Training and Development plans, we conduct several development programs while prioritizing the previously identified training needs of particular groups of personnel. Educational programs for employees help our company to provide successful solutions for problems related to new areas of our activity by maintaining the required level of competitiveness.

Our primary strategic partners in this area are the training centers that have established themselves as leading providers of education. Our company also uses a wide arsenal of modern teaching aids, which include seminars, training programs, internship programs

and distance learning in universities. We intend to further develop our system of continuous corporate trainings by developing a comprehensive perspective training program for various groups of employees of the Company and its subsidiaries.

Project "How to live Values"

This project aims to support the company employees in the decision-making process, clarify the clients and potential partners the identity of the company by letting them recognize what the company is about, as well as improve employee communication, motivation and engagement.

Having a clear set of values can help our employees understand what the Company stands for. Besides, values give them guidance for their work and a sense of security. Having a set of well-defined company values provides a moral direction to guide employees in difficult times. In a volatile environment of rapid technological, environmental, and societal changes, which is considered as much-needed constant.

As a company that primarily operates within the energy sector, Nobel Oil Services (UK) Limited is aware of its social, economic and environmental impact. To embrace responsibility for our company's actions and encourage a positive contribution to society, we strive to support sustainable development and promote various social initiatives in Azerbaijan. Our activities include promotion of business relations, sponsorship, support for empowerment, education and cultural heritage.

KEY PROJECTS

Nobel Oil participated as an instructor in the "Return disabled people to the public" trainings and attended labor fairs for the unemployed and disabled.

Financial support for the implementation of the documentary film "Miras" to popularize the heritage of the Nobel brothers in the history of the oil production in Azerbaijan.

Open training on the topic of "Employee branding" was held.

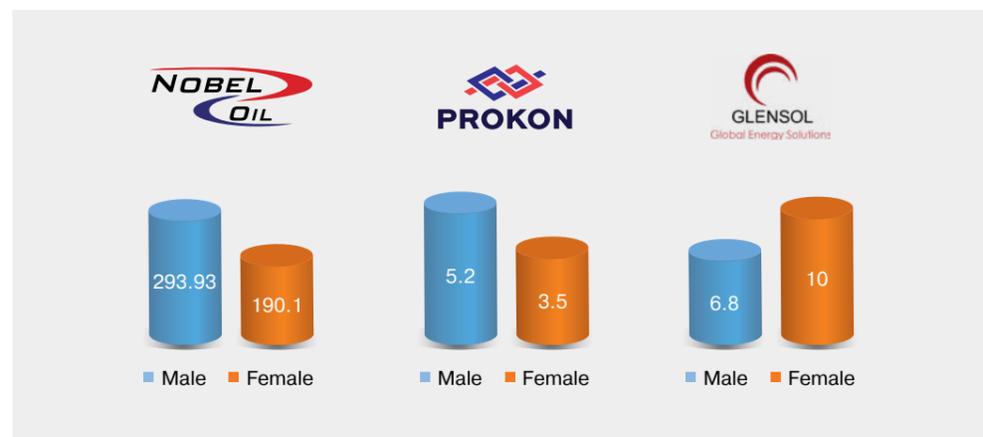

Our Company hosted one of the AMCHAM meetings.

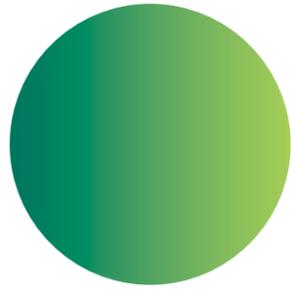

For the first time, a round table was organized in the South Caucasus and technical seminars were held on the subject of turbine equipment.

AVERAGE TRAINING HOURS SPENT EACH EMPLOYEE BY GENDER

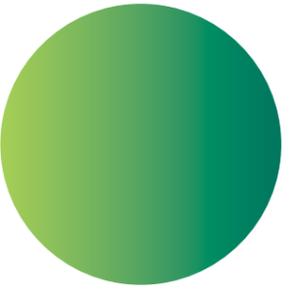

COMMUNITY ENGAGEMENT

OUR APPROACH

MANAGEMENT SYSTEM

HEALTH, SAFETY AND ENVIRONMENT

Providing safe and healthy working conditions for our employees remains a key priority for us. We work to avoid, mitigate and reduce the harm of people, communities and the environment, wherever we conduct our business. At Nobel Oil, we strive to prioritize risk management at the highest level, understanding our responsibility as a company operating in the oil & gas industry. Our HSE management system defines principles that serve the basis of our business conduct.

ZERO HARM

We adhere to the principle of “Zero Harm” in all of our operations. The principle illustrates Nobel Oil’s vision for achieving zero safety hazards, zero environmental incidents and zero non-productive time. This vision expresses our commitment to our employees, customers and society as a whole, and clearly articulates our priorities - to set the highest standards of business conduct. Our reliable management system, competence and dedication to our employees remain the key elements of our success and the foundation of our path to a Zero indicator (ZERO).

2018 RESULTS

- OHSAS 18001 and ISO 14001 international standards;
- New environmental regulatory documents were revised and prepared following the needs of the Company;
- Annual targets for 2019 were defined;
- A 2019 plan was developed and approved.

PLANS

- Improvement of the management system, the creation of a unified management system and its integration in all departments;
- Implementation of motivational tools for employees’ compliance with rules, e.g. a rewards system;
- Introduction and implementation of the updated HSE Policy;
- Introduction of observation cards.

Our health, safety, and environmental management system provide a foundation for HSE aspects consideration of projects managed by Nobel Oil. HSE Management system incorporates our values and commitments which are detailed in our HSE policy sections of company operations and its subsidiaries, practices, and procedures and plans for specific project sections. Our corporate culture, supported by the HSE management system, makes HSE a key priority for Nobel Oil’s employees and stakeholders and remains an essential factor in advancing our profitability. Management System serves as our company’s leading measure for refining our HSE conditions, as we commit to continuously improve our performance in this field.

Our industrial, occupational and environmental safety management system operates on the basic requirements of ISO 14001, OHSAS 18001, ISO 9001, and in accordance with local legislation. The field of the certification includes the organizations of the Nobel Group, whose activities involve major risks in the field of industrial, occupational and environmental safety preservation.

OUR POLICY⁵

Our Board of Directors approved the new company policy for industrial and environmental safety and labor protection. This policy acts as a fundamental document for presenting our company’s expertise and commitments in the field of HSE. The Policy formalizes standard principles and approaches in the HSE sphere to ensure the continuous development of Nobel Oil’s management system for industrial and environmental safety and labor protection.

Guiding principles:

- All injuries and occupational illnesses are preventable;

- No business objective will take priority over health and safety;
- No task is so important or urgent that it cannot be done safely;
- Safety is everyone’s responsibility;
- We operate sustainably and minimize our environmental impact.

HSE Goals:

- Achieve zero lost time incidents;
- Achieve year on year reduction in Total Recordable Injury rates;
- Promote an active health and wellbeing culture;
- Reduce environmental impacts and improve performance regularly.

HSE Committee

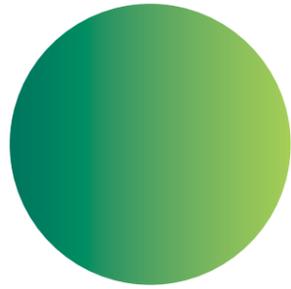

The HSE committee was established to increase the effectiveness of Nobel Oil’s activities in the field of HSE. Currently, this unit delivers regular high-quality reviews of our HSE issues and conditions, demonstrating the high prioritization of industrial and environmental safety issues to our partners and stakeholders. The committee guarantees that our management bodies are confident that Nobel Oil is appropriately managing HSE risks, implementing plans to continuously improve efficiency in this sphere. The HSE committee reviews materials on operational events, as well as reviews the summary report on previous HSE indicators.

Monitoring

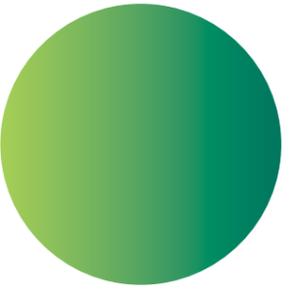

The efficiency assessment of Nobel Oil’s management system is carried out based on annual corporate control of compliance with legal requirements and corporate standards, as well as through the results of the internal audit of the state of the management system in all structures and regular external auditing of our received certifications. Besides, annual inspections by government agencies, as well as regular inspections of occupational safety measures by our clients, play an important role in enhancing the effectiveness of our management system.

HEALTH, SAFETY AND ENVIRONMENT

⁵ Information for Our Policy and HSE Committee is provided for 2019

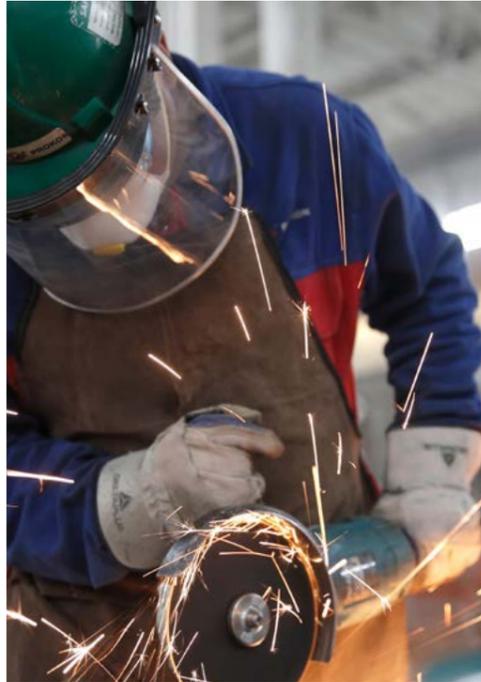

HEALTH AND SAFETY

ENVIRONMENT

HEALTH, SAFETY AND ENVIRONMENT

HEALTH, SAFETY AND ENVIRONMENT

HEALTH AND SAFETY

Our company pays the utmost attention to the creation and maintenance of safe and decent working conditions, setting the priority of these issues over any organizational and technical tasks. The life and health of our employees, contractors, customers and all of our stakeholders are the highest value to us. Therefore we make great efforts every year to maximize their safety. The direction of our focus in the field of labor protection and occupational safety remains unchanged.

We monitor workplace conditions at Nobel Oil and its subsidiaries while taking active measures to carefully analyze the causes of incidents by following necessary steps for their elimination. In our approach to ensuring occupational and industrial safety, we extend our principles and policies to all Nobel Oil employees, as well as to employees of our contracting organizations.

Our work in the field of occupational safety and health of workers is based on the following principles:

- Compliance with the local legislation
- Compliance with international standards in HSE sphere
- Ensuring production and environmental control in the implementation of all activities
- Applying a risk-oriented approach to the management of HSE issues
- Continuous improvement of our labor protection and industrial safety management system
- Developing safety culture
- Receiving constructive feedback from all stakeholders.

Assessment of working conditions

At Nobel Oil, we work systematically to improve our employees' workplace conditions. Our main method for assessing and managing working conditions is a procedure regulated by the local legislation for workplace conditions certification and by external audits participation.

GLENSOL HAS 26 ASSESSED PLACES IN OFFICE AND 7 IN WORKSHOP AREAS FOR 2018.

Our company regularly identifies and evaluates occupational conditions with a high risk of injury. In 2018, these jobs included work carried out at height, work in confined spaces, repair works on rotating equipment, etc. Firstly each of the identified high-risk jobs undergo a risk assessment, after which the best methods for minimizing impact are determined. On this basis, plans and rules of work are developed and trained inappropriately.

WE ARE PROUD TO REPORT THAT IN THE PAST TWO YEARS WE HAVE RECEIVED 0 RECORDED INCIDENTS.

Our company strives to adhere to the principles of responsible conduct and environmental preservation in all of our projects. To achieve this, Nobel Oil and its subsidiaries have clear policies and regulations that applied to our work with the environment. All of the projects that are developed and delivered to our customers must comply with relevant environmental legislation.

Our company has set itself the task of creating an integrated management system for the continuous improvement of our entire HSE management system.

In the reporting year, we have worked on the preparation of environmental regulation documents for 2019. Environmental passports of enterprises, greenhouse gas emission standards of atmosphere and the limits of discharged sewage were reassessed and presented.

ENVIRONMENTAL PERFORMANCE⁵

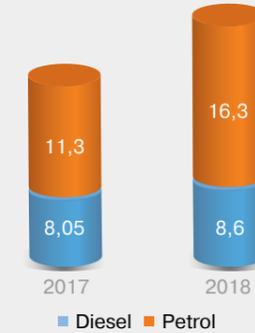

Energy consumption and greenhouse gas emissions are two of the most harmful components affecting the global environment. Recognizing its responsibility, our company seeks to reduce these impacts by increasing the efficiency of its activities. We strive to accelerate our efforts in this area by offering our customers services that maximize the value of their assets while consuming less energy and less emission production. We achieve this through the effective planning of our work and by the introduction of ecologically clean solutions. As a service company, we are unable to measure the actual energy consumption of rented office spaces and remote operation locations. For this reason, we estimate the energy consumption of our rented premises according to the method of HSE Plan.

SANCTION FOR NON-COMPLIANCE WITH LEGISLATION OR REGULATORY REQUIREMENTS DURING THE REPORTING PERIOD HAS BEEN IMPLEMENTED.

ENERGY CONSUMPTION, thousand kWh

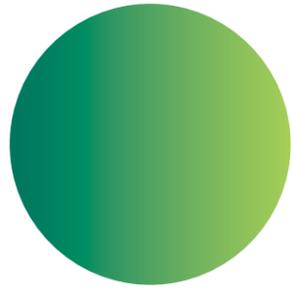

FUEL CONSUMPTION, tons

GHG EMISSIONS, tons CO₂

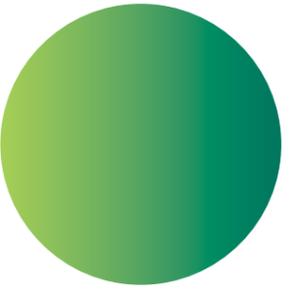

⁵As the data for Prokon is provided only for 2018, we have decided to combine indicators of the company's subsidiaries in this report. Because of this, a sharp increase in 2018 which can be observed in comparison to the indicators for 2017

ENVIRONMENT

ENVIRONMENT

HEALTH, SAFETY AND ENVIRONMENT

Water Consumption

Our company recognizes the value of water as one of the most precious resources in the world. Pollution and poor water management will have a direct impact on the organization, as well as a negative impact on the environment and society. We encourage our employees to use water efficiently and rationally for project implementation purposes and regular use. During project planning, we carefully examine the area and water resources to eliminate potential negative impacts and deliver effective water management. Our ability to regulate and report on water consumption depends on the office location. In most of the rented space cases, we do not pay water bills directly and do not manage it,

which creates difficulties in tracking our consumption and conservation or results in the quantification of our efforts. However, in such circumstances, the company uses the ratio of water per employee.

WATER CONSUMPTION, thousand tons

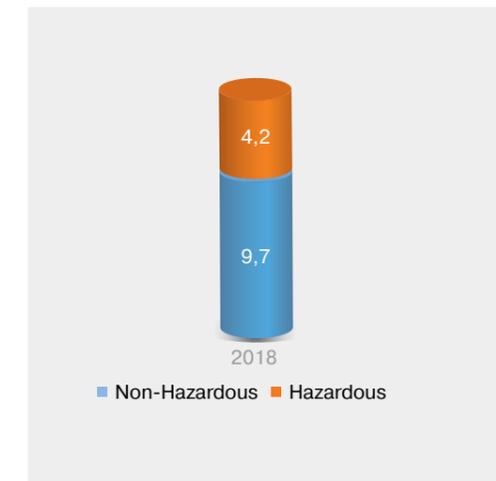

HEALTH, SAFETY AND ENVIRONMENT

Waste management

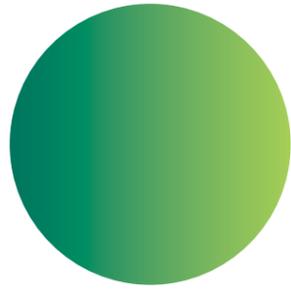

We carefully and regularly monitor the pace of waste build-up and disposal. Total waste varies from year to year, depending on the project portfolio. We monitor the entire process of collecting, transporting and waste disposing of by agreeing with a highly qualified company. We also actively consider potential reuse or recycling options for waste management.

The company generates two main categories of waste, hazardous and non-hazardous wastes. As it is evident from the diagram, a significant part of the waste generated in connection with company activities is non-hazardous.

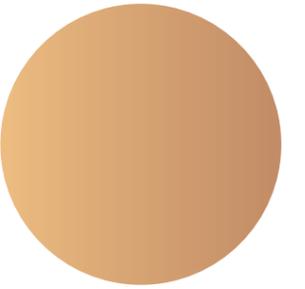

WASTE, thousand m³*

*Wastes for 2017 were insignificant, therefore the relevant data for 2017 is not reported

TRAINING

HEALTH, SAFETY AND ENVIRONMENT

Our company pays great attention to delivering systematic training and ensuring competence regarding industry safety, environment safety and labor protection for all employees. Nobel Oil and its subsidiaries regularly hold events to improve and develop the necessary skills of all personnel and contractors in this area. Our activities primarily include conducting of face-to-face training, retraining and qualification advancement programs with most up to date materials for our workers, implementing special training system for personnel working with dangerous equipment, as well as increasing the quality of safety-related communication.

THE NUMBER OF AUDIENCES

⁷Information about HSE Trainings audiences of Prokon is available only for 2018

SUPPLY CHAIN

In today's globally competitive economy, we are aware that strong relationships with our suppliers are essential to satisfying the needs of all our stakeholders.

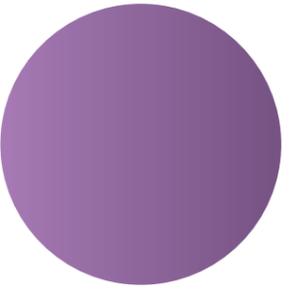

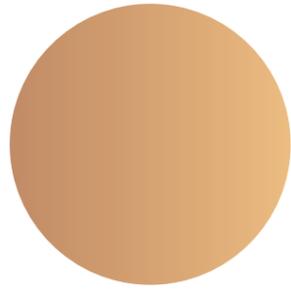

While building cooperation with contractors, our company is always striving to increase the efficiency of our supply chain management while ensuring transparency and competitiveness. Procurement is a part of our commitment to sustainability. We strive to maximize our positive economic and social contribution and minimize our environmental impact. Each year, the company depending on activity purchases a significant amount of goods and services. The purchases help our suppliers to maintain financial stability, sustain jobs and promote their development.

Depending on the specifics of activity, the company applies a supplier management system, which consists of several procedures suppliers governing involvement, their selection and our subsequent work with them. Our procurement activities are fully compliant with the local legislation.

Supply Chain Overview
The company's supply chain includes specialized contractors, subcontractors and manufacturers licensors, consultants, etc. In 2018, there were no significant changes in the supply chain. As can be seen from the diagrams, the share of local suppliers in each company subsidiary exceeds 90%. Our international contractors mainly supply specific equipment and reagents.

EXPENSES IN PERCENTAGE FOR 2018 YEAR

Preventive actions

We operate a supplier management system that allows for a preliminary qualification assessment of our suppliers for their compliance with corporate requirements, before engaging them in any competitive procedures. Each supplier who plans to conduct business with us must undergo the necessary verification and be able to meet our company's standards. We examine them for unethical practices. When performing a comprehensive audit of new suppliers, we carefully evaluate their compliance with financial activity, historical background, HSE standards and ISO certifications.

The clauses on Anti-Bribery and Corruption (ABC) and the Right to Audit are included in contracts with subcontractors and suppliers for service and product purchases. Our goal is to ensure that suppliers comply with internal rules and procedures to prevent potential risks of corruption. The clause on the right to audit allows the company to initiate regular inspections within the supplier in case of suspicious transactions and irregularities.

Additionally, we monitor our suppliers in a database that provides information on their commitments and performance history. Suppliers that are revealed

to demonstrate inconsistencies with the corporate requirements as per the results of our comprehensive assessment, are not allowed to tender.

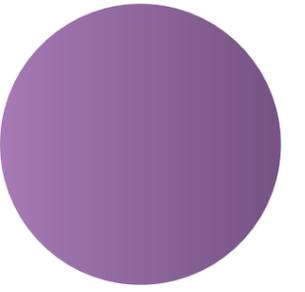

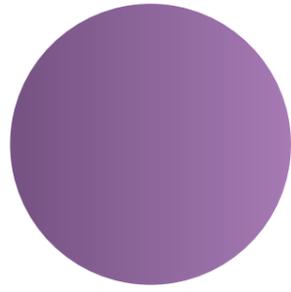

The Company's plans and main objectives:

- Improve transparency by applying new, adopted and improved fraud detection and prevention techniques;
- Maximize value by delivering the right item at the right price at the right time;
- Support business continuity by sustaining continuous supply, increasing leverage power in the market and being adaptive to market dynamics.

The Company already planned to implement in practice Common Vendor Database (CVD), e-Source, and e-Tender common platforms. Through this, we will be able to deploy the e-Procurement process under the corporate office. The platforms will spread to all group companies, which increases internal productivity.

The creation of the e-Procurement system in common platform has already started. The first stage of CVD is ready for operation; second and third tools of e-Source and e-Tender are in process and planned to be launched by the 2021.
